

Raytheon Recognition of Rantec Power Systems

Four Star Supplier Award - 2009

Rantec Power Systems was recently awarded Raytheon's prestigious "Four Star" award in recognition of our exceptional performance.

Rantec (who also won this in 2008) was particularly honored to be the only power supply company receiving this honor in 2009.

Preferred Supplier Status - 2010

In an effort to raise the performance bar and reduce their number of power supply vendors, Raytheon conducted an extensive evaluation of their supplier's performance and capabilities, prior to down-selecting a core group of suppliers with whom they will work on future opportunities.

We are proud that **Raytheon has granted Rantec Power Systems "Preferred Supplier Status" across all Raytheon divisions.** Rantec looks forward to expanding our support of Raytheon programs as a value-focused teammate.

"Best Value Power Solutions for Demanding Applications"

How can we help you?
